

# FAM SYSTEMS

## FAM OxyTech Oxygen Measurement Probe

### FEATURES

- Installs directly into the molten tin bath
- Short Recovery Time
- Direct measurement without extractive sampling
- In situ Measurement
- High temperature resistance
- No distance limitations between sensor and controller

### BENEFITS

- Continuous measurement
- Analog output
- Rapid response to atmosphere changes
- No need for calibration
- No maintenance requirement

# FAM SYSTEMS

## FAM OxyTech Oxygen Measurement Probe

### SPECIFICATIONS

Output	: Sensor millivolts proportional to oxygen concentration
Oxygen Range	: PPM to 21 %
Response Time	: Less than 1 second
Accuracy	: +/- 5 % of the process value
Stability	: < 1 % deviation in 12 months
Control System Interface	: FAM OxyTech Control Instrument

Protection Tubes	: Aluminium sensor head Stainless steel protection tube Alumina housing tube Ceramic measuring tip
------------------	---

Mounting	: Vertical or Horizontal
Length	: Total 116 cm
Operating	: 650 – 1500 °C
Ordering Information	: FAM OxyTech Probe

The OxyTech oxygen sensor is a "simple apparatus" and thereby intrinsically safe per EN50 14 Clause 1.3.
